

Key Knowledge—The Graphite Pencil Scale

- Know that there are different grades of pencils that create different marks
- Know that shadows form opposite the light source
- Know that 3D shapes are foreshortened when seen from different angles

Key Skills

- Be able to use different shading techniques such as smudging, blending, stippling and cross hatching
- Be able to use a range of pencils grades to create different effects
- Be able to foreshorten a circle to draw realistic 3D objects

Key Vocabulary

Vocabulary	Definition
Foreshortening	Representing 3D objects on a 2D surface
Stippling	Drawing, shading and painting using various small dots and specks
Light Source	The point at which the main light is coming from
Ellipse	A representation of a circle viewed from an angle
Parallel lines	Two lines that are always the same distance apart and never touch
